

Furqaan Nabi

Full-Stack Engineer — Infrastructure, Privacy & Autonomous Systems

✉ hi@furqaannabi.com | 🐙 github.com/furqaannabi | 🔗 linkedin.com/in/furqaannabi | ✖ x.com/0xfurqaan | 📷 instagram.com/furqaannabi | 🌐 furqaannabi.com

PROFESSIONAL SUMMARY

Full-stack engineer focused on infrastructure, privacy, and autonomous systems. Experienced in building everything from private settlement layers to AI-driven protocols, with an emphasis on systems designed to operate at scale, under pressure, and without reliance on centralized control. Multiple-time hackathon winner across leading Web3 ecosystems.

CORE COMPETENCIES

- **Full-Stack Engineering.** React, Node.js, and scalable backend systems.
- **Smart Contracts & Web3.** Solidity, EVM, and cross-chain development (CCIP).
- **Infrastructure & Systems Design.** High-throughput, decentralized architectures.
- **AI & Autonomous Systems.** LLM-powered workflows and agent-based execution.
- **Cloud & DevOps.** AWS, Docker, and distributed systems.

EDUCATION

Bachelor of Computer Applications

Fintech & AI — Amity University

Expected 2028

TECHNICAL SKILLS

Solidity · React · Node.js · EVM · CCIP · Chainlink CRE · AWS
· Docker

SELECTED PROJECTS & AWARDS

ArcAsset

\$1.17K

World Selfie Check Prize — ETHGlobal ETHOnline · Sep 2026
Autonomous agents servicing tokenized private credit on Arc — World ID-gated issuance, a bounded-authority agent that advances periods, marks delinquency, and distributes coupons in native USDC, with repayment data sold per query via x402.

SSL — Stealth Settlement Layer

\$10K

1st Place, Privacy Track — Chainlink Convergence · Mar 2026
Privacy-preserving dark pool for tokenized RWAs — orders matched confidentially inside a Chainlink CRE TEE, with World ID + ACE compliance and single-use shield addresses for settlement.

DealForge

\$1K

2nd Place — Synthesis (EigenCloud Track) · Apr 2026
Trustless protocol where AI agents negotiate, escrow, and settle deals on-chain — LLM negotiation with TEE-attested verification on Base.

ArcFlow

\$2.5K

Track Winner — ETHGlobal HackMoney (Arc) · Feb 2026
Cross-chain payroll with yield — idle USDC earns via Uniswap V4 LPs, then an AI agent auto-bridges payouts through Circle Gateway to Arc Chain.

Memed.Fun

\$20K

1st Place — Lens Spring · May 2025
Platform for creators to mint meme tokens, battle for supremacy on Lens, and reward communities through staking and engagement rewards.

SAVR

\$2.5K

Honorable Mention — Lens Holiday · Jan 2025
Decentralized ROSCA for group savings — smart contracts pool contributions, earn yield via Aave, and coordinate cross-chain over Chainlink CCIP.

RepCheck

\$7K

2nd Place — QuickNode Build On · Nov 2024
On-chain DeFi reputation protocol on an Avail rollup, tracking Uniswap/Aave activity via QuickNode Streams & Functions with PYUSD staking multipliers.
