PROFESSIONAL SUMMARY

Full-stack engineer focused on infrastructure, privacy, and autonomous systems. Experienced in building everything from private settlement layers to AI-driven protocols, with an emphasis on systems designed to operate at scale, under pressure, and without reliance on centralized control. Multiple-time hackathon winner across leading Web3 ecosystems.

CORE COMPETENCIES

- **Full-Stack Engineering.** React, Node.js, and scalable backend systems.
- **Smart Contracts & Web3.** Solidity, EVM, and cross-chain development (CCIP).
- **Infrastructure & Systems Design.** High-throughput, decentralized architectures.
- **AI & Autonomous Systems.** LLM-powered workflows and agent-based execution.
- **Cloud & DevOps.** AWS, Docker, and distributed systems.

EDUCATION

Bachelor of Computer Applications

Fintech & AI — Amity University

Expected 2028

TECHNICAL SKILLS

Solidity · React · Node.js · EVM · CCIP · Chainlink CRE · AWS
· Docker

SELECTED PROJECTS & AWARDS

Memed.Fun

1st Place — Lens Spring · May 2025

Platform for creators to mint meme tokens, battle for supremacy on Lens, and reward communities through staking and engagement rewards.

\$20K

SSL — Stealth Settlement Layer

1st Place, Privacy Track — Chainlink Convergence · Mar 2026

Privacy-preserving dark pool for tokenized RWAs — orders matched confidentially inside a Chainlink CRE TEE, with World ID + ACE compliance and single-use shield addresses for settlement.

\$10K

RepCheck

2nd Place — QuickNode Build On · Nov 2024

On-chain DeFi reputation protocol on an Avail rollout, tracking Uniswap/Aave activity via QuickNode Streams & Functions with PYUSD staking multipliers.

\$7K

+ 4 more wins

ArcFlow (\$2.5K) · SAVR (\$2.5K) · ArcAsset (\$1.17K) · DealForge (\$1K).
