

Furqaan Nabi

Full-Stack Engineer — Infrastructure, Privacy & Autonomous Systems

hi@furqaannabi.com | github.com/furqaannabi | linkedin.com/in/furqaannabi | x.com/furqaan | instagram.com/furqaannabi | furqaannabi.com

PROFESSIONAL SUMMARY

Full-stack engineer focused on infrastructure, privacy, and autonomous systems. Experienced in building everything from private settlement layers to AI-driven protocols, with an emphasis on systems designed to operate at scale, under pressure, and without reliance on centralized control. Multiple-time hackathon winner across leading Web3 ecosystems. Two-time startup founder, currently open to starting something new or joining a team.

EXPERIENCE

Memed.Fun — *Founder*

Jun 2025 – Jul 2026 · Sunset

Took the Lens Spring 1st-place project ($20K) full-time — creators mint their own meme tokens, battle for supremacy on Lens, and reward their communities through a staking and engagement-rewards ecosystem. Solidity, Lens, Node.js, IPFS.

Werepl — *Founder*

Oct 2022 – May 2024 · Sunset

First startup, and where I started coding. A crowdsourced blacklist for a safer web, launched on BNB Chain — users reported harmful sites, validators verified them, and the blacklist was served to browsers and wallets via APIs and forwarded to registrars and hosting providers for takedown. Soulbound Passes recorded each validated report, with daily token rewards for reporters and validators. Litepaper.

CORE COMPETENCIES

- **Full-Stack Engineering.** React, Node.js, and scalable backend systems.
- **Smart Contracts & Web3.** Solidity, EVM, and cross-chain development (CCIP).
- **Infrastructure & Systems Design.** High-throughput, decentralized architectures.
- **AI & Autonomous Systems.** LLM-powered workflows and agent-based execution.
- **Cloud & DevOps.** AWS, Docker, and distributed systems.

EDUCATION

Bachelor of Computer Applications

Fintech & AI — Amity University

Expected 2028

TECHNICAL SKILLS

Solidity · React · Node.js · EVM · CCIP · Chainlink CRE · AWS · Docker

SELECTED PROJECTS & AWARDS

Memed.Fun — $20K

1st Place — Lens Spring · May 2025

Platform for creators to mint meme tokens, battle for supremacy on Lens, and reward communities through staking and engagement rewards.

RepCheck — $7K

2nd Place — QuickNode Build On · Nov 2024

On-chain DeFi reputation protocol on an Avail rollup, tracking Uniswap/Aave activity via QuickNode Streams & Functions with PYUSD staking multipliers.

SSL — Stealth Settlement Layer — $10K

1st Place, Privacy Track — Chainlink Convergence · Mar 2026

Privacy-preserving dark pool for tokenized RWAs — orders matched confidentially inside a Chainlink CRE TEE, with World ID + ACE compliance and single-use shield addresses for settlement.

+ 4 more wins

ArcFlow ($2.5K) · SAVR ($2.5K) · ArcAsset ($1.17K) · DealForge ($1K). Full details at furqaannabi.com.
